

Marllon Rodrigues

Software & Automation Engineer

marllonsantos@gmail.com | linkedin.com/in/rodriguesmarllon | github.com/rodriguesmarllon

Technical Skills

Software Development: TypeScript, Node.js (Fastify, NestJS), Vue.js (Quasar), React, Next.js, Java, C# (.NET), Python, Prisma, PostgreSQL, Redis, Cloudflare R2, Docker, CI/CD (GitHub Actions), SwiftUI, Git.

Industrial Automation: PLC (Siemens S7-1200/1500, Rockwell, Schneider M580), HMI/SCADA (AVEVA Plant SCADA/Citect, System Platform, InTouch, Historian, FactoryTalk, ISA-101), SEL Relays, IEC 61850, Modbus TCP, Industrial Networks, IT/OT Integration.

Experience

Co-Founder & Tech Lead, SIMP (Municipal SaaS Startup)

Sep 2025 - Present

- **Multi-Tenant SaaS (SIMP):** Architecting and developing a B2B municipal management ERP from the ground up — full multi-tenancy, RBAC, Kanban workspaces, SSE notifications, Cloudflare R2 uploads. Stack: Fastify v5, React 19, Prisma, PostgreSQL, Redis, deployed on Vercel + Render.
- **Financial Intelligence:** Built predictive financial diagnostics module using Z-score analysis and ETS forecasting algorithms for automatic anomaly detection in municipal budgets.
- **AI-Powered DevOps:** CI/CD pipelines with autonomous Claude AI agents for automated PR code review, security analysis (TruffleHog, CodeQL), and failure diagnostics on every commit.
- **Mentorship:** Technical mentoring of a junior developer who evolved into an autonomous full-stack contributor resolving issues and delivering features independently.

Full Stack Engineer, Bunkerchain (Singapore/Remote)

Jun 2025 - Present

- **eBDN Platform (Methanol):** Full-stack development on Bunkerchain's electronic Bunker Delivery Note system for Methanol cargo operations — a critical maritime compliance tool used by operators in real-time.
- **Feature Delivery (Quasar/Vue.js):** End-to-end delivery of the Terminal Role feature — from architecture to live client demo approval — enabling terminal operators to participate in digital bunkering workflows.
- **Backend & Integration:** Corrective maintenance and feature development on a Java API backend, ensuring data integrity across international maritime operations.
- **International Environment:** Daily collaboration in English with a Singapore-based team; direct technical support to international clients and ticket management via Mantis in agile rituals.

Automation Analyst, Tyconnex / Schneider Electric (Singapore)

Feb 2026 - Present

- **FPSO Commissioning (Petrobras):** On-site commissioning engineer for AVEVA Plant SCADA (Citect) systems on two offshore platforms (P83 and P80) — 50,000+ tags, 1,700+ field devices, Schneider M580 PLCs.
- **IEC 61850 & Protocols:** Configuration and validation of SEL protection relays (F650, 869, 845) and Danfoss VFDs via IEC 61850 MMS and Modbus TCP; RTU signal mapping and ESA logic integration.
- **EPO Device Integration (Automotive):** Commissioned SEL 2414 protection relays in AVEVA Power Operation (EPO) for an automotive manufacturing facility in Brazil — IEC 61850 device configuration, tag addressing, and polling validation.
- **Field Engineering Tool:** Built a custom offline Tag Finder web app (single HTML, 4MB) consolidating SCADA project data across 5,000+ equipment entries for real-time field troubleshooting on both platforms.

Systems Developer, MAIMA Technology

Aug 2024 - May 2025

- **SAP Automation (RPA):** Development of Python robots for automation of 4–6 critical daily SAP processes, reducing manual execution time from 8 hours to 2 minutes.
- **Predictive Maintenance:** C# system for machine downtime prediction based on product quality analysis (dental bristles), anticipating critical failures before occurrence.
- **Microservices Architecture:** Segregation into distributed microservices (Image Analysis, Data, BFF), ensuring scalability and simplified maintenance.

Automation Technician, S.Build Automation

Jun 2022 - Aug 2024

- **Field Engineering & Commissioning:** Specialist in implementing AVEVA System Platform ecosystems, InTouch interface development, and Historian configuration in critical industrial environments.
- **Industrial Tech Stack:** Projects with Siemens PLCs (S7-1200/1500), Rockwell (Control/Compact/MicroLogix), and

Schneider. Networks: Profinet, Ethernet/IP, Modbus, OPC. Workflows: **AVEVA WorkTasks**.

- **Data Automation & Retrofit:** Python scripts for mass SQL updates in AVEVA MES; legacy migration (1995 → 2023) and reverse-engineering retrofit of undocumented machines; upgrade of 20+ servers via ThinManager.

WorldSkills Competitor (Mechatronics), SENAI Roberto Simonsen

Sep 2021 - Feb 2023

- **State Champion (São Paulo Skills):** Selected as **Top 1 Student** of SENAI Roberto Simonsen for the elite team; team became **State Champion**. Training: 8–10 daily hours of precision assembly, PLC programming, and Festo MPS stations under competition pressure.

Certifications

- **CSI AVEVA** Manufacturing Execution System (MES) 2020 - Operations & Performance Exams
- **CSI AVEVA** Application Server 2023 Exam
- **.NET Developer Bootcamp** (DIO - 93h) **Java OOP** (Udemy - 54.5h) **Node.js Fundamentals** (DIO - 30h)

Education

UNINTER, Systems Analysis and Development	2023 - 2025
SENAI Roberto Simonsen, Computer Networks Technician	2021 - 2022
SENAI Roberto Simonsen, Electronics Maintenance Electrician	2020 - 2022

Languages

- English (C1 - Advanced)
